********************Documentation of SVN BACKUP************************

Source file: svnbackup.bat

Scripting language: Batch (Interpreter) [Microsoft windows]

Testing and development environment:

OS: Microsoft Windows-10, Linux (ubuntu-15.10)

Date: 14th Dec 2016

Summary:

Creates the backup of a SVN repository using the SVN checkout and SVN update.

Enables manual synchronization of local files with the SVN repository.

Implementation:

svn -co <svn-reponame>

this should be performed on a location where checkout needs to be performed.

svn update

this should be performed on a location where checkout was previously to be performed.
